# OILFIELDS HIGH SCHOOL 2019/2020 GRADE 10 COURSE SELECTION

This form is to help you plan and choose courses for the upcoming school year.

## CHOOSING COURSES

Please follow the instructions in the right hand column and check off the courses you wish to take under the Student Choice column.

The courses chosen in Grade 10 determine the Grade 11 and Grade 12 courses that can be completed in the future and, therefore, determines the post-secondary programs/careers to which students may pursue. (EG: science 10 to biology 20 to biology 30 to nursing program or paramedic training).

Information about graduation or post-secondary requirements, can be researched through students' myBlueprint accounts and on the Oilfields' Student Services website.

Choose courses carefully because the timetable is created based on student choices. Once the schedule has been built, specific changes may be difficult to make, depending on where courses are offered in each semester. Selection of a course does not ensure it will fit it into a student's schedule, although every attempt will be made to accommodate student choices.

- Grade 10 classes are pre-requisite courses for going into grade 11.
- CALM/CTR and Physical Education 10 are mandatory for graduation. They are already checked off on the form.
- Select at least 5 option classes and numbered them (#1 being your top choice) to ensure timetable change flexibility. We will do our best to accommodate your top choices.
- Spares are offered in grade 12 only.

**TEACHER COURSE RECOMMENDATIONS ARE ALREADY CHECKED OFF. IF THERE ARE ANY QUESTIONS REGARDING TEACHER'S RECOMMENDATIONS, PLEASE CONTACT THE TEACHER DIRECTLY.**

If students want to choose a class that they were NOT recommended for, and they passed the pre-requisite course, then students and parents must meet with our career/academic advisor or an administrator to ensure they understand the expectations and academic rigor involved in taking the course.

Any student may apply to the **QUEST PROGRAM**, a multi-grade community of learners that engage in cross curricular inquiry through environmental and outdoor education.
